➞ [Click here for my portfolio](#)

Detail-oriented Software Engineer with experience in full-stack development and a strong foundation in frontend and backend technologies. Skilled in modern development frameworks, database management, responsive design principles, and cloud technologies, with a passion for building scalable, efficient, and user-focused solutions. Experienced in developing and contributing to real-world applications while applying problem-solving and analytical skills to deliver high-quality results. Quick to learn and adapt to emerging technologies, with the ability to collaborate effectively within cross-functional teams and work in dynamic environments. . Additionally, bring one year of Civil Engineering industry experience, strengthening analytical thinking, project coordination, and multidisciplinary problem-solving abilities.

Work Experience

Associate Software Engineer | BinaryWise

From April 2025 to Present

- Working in full stack capacity on real world projects.
- Tech stack - Fast Api, Django, React
- AWS Cloud | Google Cloud Services

Software Engineer (Intern) | BinaryWise

From September 2025 to March 2025 (6 months)

Engineering Assistant (Trainee) | NWSDB

September 2023 to March 2024 (6 months)

Trainee Assistant Civil Engineer | Southern Construction & Engineering [Pvt] Ltd

March 2023 to August 2024 (6 months)

Education History

Bachelor of Information Technology (external) | University of Moratuwa

2023 - 2026

- Graduated with First Class | Final Year GPA - 3.72 | CGPA - 3.43
- Level 2 Semester 2 Dean's List Recognition
- Level 3 Semester 2 Dean's List Recognition
- Final year Project - AI based Pet Adoption and Rescue platform (Purrfect) | A-

National Diploma in Technology | Institute of Technology University of Moratuwa

2020 - 2024

- Civil Engineering Technology

GCE Examinations | Richmond College Galle

2014 - 2018

- GCE A/L Examination 2018 | Combined Maths - B, Chemistry - C, Physics - C
- GCE O/L Examination 2014 | 8 'A' passes & a 'B' pass

Projects

Purr-fect | AI based pet adoption and rescue app

- Final year project consisting of AI based pet recommender, Rescue reporting, Lost pet founder, Stray locator and an In-built Pet store.

 - Frontend (Mobile) - <https://github.com/harrencode/purrfect-frontend-mobile>
 - Backend - <https://github.com/harrencode/purrfect-backend>
- Tools & Technologies - Python, Fast API, MySQL, React, React Native
- Demo - <https://purrfect-frontend-web.vercel.app/signin>
(email - admin1@example.com, password - yourStrongPassword)

Highway Bus Mate*

- Application to assist those who use highway buses in Sri Lanka. This app will help people to view timetable, Seat reservation, E-ticket, Live tracking
- GitHub Repository - <https://github.com/harrencode/highway-bus-mate>
- Tools & Technologies - Python, Fast API, PostgreSQL, React, React Native

Lunar*

- This application is designed to help users understand and manage their menstrual cycle by tracking periods, symptoms, and cycle patterns. It includes smart cycle predictions, gentle daily wellness tips based on cycle phases, mood and energy insights, and private reminders, making it easier to plan daily activities and support personal well-being.
- GitHub Repository - <https://github.com/harrencode/lunar-period-tracker-app>
- Tools & Technologies - Python, Fast API, MySQL, React, React Native

VRS Vehicle Renting System

- This is a group project to develop a reliable, user-friendly, and efficient web-based Vehicle Renting System that allows customers to book and manage vehicle rentals seamlessly, providing a solution to the inefficiencies in the current manual process.
- GitHub Repository - <https://github.com/SaviduOfficial/carRental>
- Tools & Technologies - PHP, MySQL, JS, Bootstrap

MAD Word Guessing Game (android)

- The Word Guessing Game is a mobile application built for Android, offering players a fun and interactive experience where they attempt to guess a hidden word within a limited number of tries.
- GitHub Repository - https://github.com/harrencode/mad_word_guessing_game
- Tools & Technologies - Android Studio, Java, Dreamlo API

SLT Data Monitor extension

- Chrome/Edge extension that tracks your SLT MySLT broadband usage, shows real-time remaining data (every 30 mins) , and alerts you when your data is running low.
- GitHub Repository - <https://github.com/harrencode/slt-extension>
- Tools & Technologies - JavaScript, HTML, CSS, Chrome Extension APIs, Manifest V3, PowerShell

Skills & Specialization

- **Programming Languages** | Python, JavaScript, Java, PHP, C#
- **Frameworks & Technologie** | FastAPI, Django, React, React Native, Springboot
- **Database Management** | MySQL, PostgreSQL
- **Cloud & Tools** | AWS Cloud Services, Google Cloud Services, GitHub, Android Studio
- **Development Expertise** | Full-Stack Development, REST API Development, Responsive Web Design, Mobile Application Development, Database Design
- **Software Engineering Practices** | Object-Oriented Programming (OOP), Version Control, Agile Development, Problem Solving, Testing & Debugging
- **Visualization** | Figma, Sketchup + Lumion, Adobe Photoshop, Adobe Illustrator, AutoCAD, Revit
- **Soft Skills** | Team Collaboration, Communication, Adaptability, Analytical Thinking, Time Management, Continuous Learning, Attention to Detail

Licenses & Certifications

SQL Intermediate & Basic Certificates

HackerRank

Intermediate Level in English Language and Literature

Aquinas College of Higher Studies

Student Membership | IIESL

Institution of Incorporated Engineers, Sri Lanka
